– Working ON Foods

26 marzo 2024 ore 16.00- aula 4

Spok 01- Promoting sustainability in food production is a complex and multi-faceted challenge that requires a concerted effort from various stakeholders, including government agencies, NGOs, and industry organisations. To achieve this goal, it is important to provide in-depth and scientifically sound answers to some key questions.

Making consumers' food habits more sustainable is a key element for reducing the environmental impact of food (and food waste) and for people's health. Therefore, any strategy for promoting sustainable diets among people cannot ignore an analysis of the social context of consumer rights and gender equality and the reduction of child labour in food systems.

*Introduzione: Prof. ssa Agata Matarazzo- Dipartimento Economia e Impresa-
Università degli Studi di Catania*

*Interventi programmati da parte dei docenti, dottorandi ed assegnisti coinvolti
nel progetto*

*Conclusioni: Prof Alessandro Ruggieri- Dipartimento di Economia e Impresa -
Università degli Studi della TUSCIA – presidente AISME, Accademia Italiana di
Scienze Merceologiche*
